Fibreboard Boxes 4G

CERTIFIED PACKAGINGS

Fibreboard Boxes 4GV

Our extensive range of 4G boxes have been tested and approved as UN Combination Packagings with a variety of different Inner Packagings in Glass, Plastic, Tinplate Steel and Aluminium. Consult our Inner Packaging insert sheet for details.

To choose an approved Combination Packaging, select an appropriate Inner Packaging from our insert sheets and identify the "Box Ref" for the quantity of inners required. Then match this "Box Ref" to the appropriate 4G Box overleaf.

Our range of 4GV boxes or Superpacks are Special Outer Packagings that allow the transport of NON-SPECIFIED inner packagings up to a stated maximum weight. A Superpack must be packed strictly as instructed and the Inner Packagings MUST conform to the General Packing Requirements within the Transport Regulations.

I.E. Good quality, compatible with the product, leakproof within temperature and pressure variations, with secure closures. Maximum weight includes contents and inner container.

Outer Packaging

FIBREBOARD BOXES: 4G OUTER PACKAGINGS
